EXECUTIVE DEVELOPMENT PROGRAMME
EDP@UKM-GSB

GRADUATE SCHOOL OF BUSINESS
UNIVERSITI KEBANGSAAN MALAYSIA

All our Training Programmes are 100% HRDF claimable under the Skim Bantuan Latihan (SBL), subject to prior application to HRDF by the employers/companies.
The National University Of Malaysia (UKM) was established on May 18, 1970, with the first batch of 190 undergraduates and 1 post-graduate registered at 3 faculties- Science, Arts, and Islamic Studies. Since then, UKM has seen tremendous growth in being able to provide an increasing number of places of learning for the people as well as undertaking research in various disciplines and fields of study. It now has 13 faculties, a Graduate School of Business (UKM-GSB), as well as 16 research institutes of excellence in education.

42 years since its inception, UKM has produced 146,362 graduates. The university has since attracted global attention, with 2,937 students from 42 nations. UKM was also appointed as one of the four research universities of Malaysia in 2006 based on its excellent record in research for 40 years. That recognition has gained further ground when the Malaysia Genome Institute (MGI) and the International Institute of Global Health, United Nations University were set up at the university. Its areas of research were further consolidated and enhanced with the identification of eight niche areas; Challenges to Nation Building, Sustainable Territorial Development, Renewable Energy, Health and Medical Technology, Climate Change, Nanotechnology and Advanced Materials, Biological Diversity in Biotechnology Development, and ICT: Content Informatics.

**UKM-GRADUATE SCHOOL OF BUSINESS**
WHY DO YOU NEED AN EXECUTIVE DEVELOPMENT PROGRAM (EDP)?

What is EDP?
The Executive Development Program (EDP) is a short training programme designed to empower executives and managers with the necessary tools and techniques to build the skills and gain the knowledge they need to boost today’s performance and sustain it into the future. EDP is a process of continuous learning and growth to bridge the gap between what the individual already knows and what the individual must learn to prepare for future managerial roles.

Why EDP is important?
The EDP is gaining importance nowadays due to the rapid progress and changes in the digital technology that leads to cutthroat competition and complexity of the business organisations. Executives and managers require continuous learning to cope with the disruptive innovations and growth of new ways of doing business as well as the growing public and government interest in business activities. Executives and managers need to adopt a much broader outlook to discharge their new responsibilities. Hence, EDP provides the necessary tools to broaden the outlook of managers.

What are the benefits of EDP to the participants?
EDP is positioned to help high-potential executives to refine their leadership skills and business perspectives by learning conceptual frameworks, techniques, and formulate their companies’ strategy to compete effectively in today’s rapidly changing global economy. EDP will provide the practical tools to assist participants in achieving improved business practices and reap tangible benefits in the companies’ performances as the result.

In addition, EDP prepares successful functional-level executives for general management responsibilities as the programme is structured to improve current and future managerial performance. In short, EDP will assist companies in preparing executives and managers for better performance and helping them to realise their full potential.

Design of EDP@UKM-GSB
The EDP at UKM-GSB is designed as a stand-alone 1- or 2-day course with themes covering project management, strategic marketing, strategic management, research, finance, accounting and educational tourism, conducted at UKM-GSB Corporate Campus in Kuala Lumpur.

Trained by an outstanding group of professors with extensive experience and expertise in various business areas, the programme prepares participants with the critical capabilities to succeed in an ever-changing global business environment. In each session, a university professor or a consultant will teach and facilitate participants in order to provide them with opportunities to be exposed to the latest concepts on the selected subject matters. The pedagogy of EDP is the lecture mode by employing the case studies with some interactive workshop activities.
MANAGING CSR PROJECT EFFICIENTLY

Fazli Idris (Dr) conducts course in Operations Management based on his industrial experience working for SONY Corporation, prior to joining UKM. He also manages MBA Projects & conducts trainings in project management, operations strategy & quality management.

Corporate Social Responsibility (CSR) has become an important business practice or a strategy to improve engagement with the community and create a shared value with all stakeholders that will lead to sustainable business growth. This course introduces participants to concepts, methods, techniques and a practical new framework in CSR project management based on real numerous CSR projects managed by UKM-GSB. CSR Project management is the application of processes, methods, knowledge, skills, and experience to achieve the project objectives. It is a methodical approach to planning and guiding CSR project processes from start to finish. Proper techniques and best practices will be taught for the CSR projects to be expertly managed and delivered as planned.

Objectives:
1. Build a realistic CSR Project Management Plan
2. Explain the method of applications based on best practices
3. Mitigate and manage the CSR project risks through risk management procedures

Methodology:
Lecture, multiple CSR case studies, group exercise and class discussion

Who should attend?
Senior Managers, Managers, & Executives especially in Human Resources and Corporate Communications.

Programme outline:

Day 1 8:30am-5:30pm
• Introduction to CSR Project Management/ Framework

• CSR Project Management Process and Integration

• CSR Project Management Scope

• CSR Project Management Time and Costs

Day 2 8:30am-5:30pm
• CSR Project Quality, HR and Communication Management

• CSR Project Procurement Management

• CSR Project Risk Management

• CSR Project Stakeholder Management and Professional Conducts
Datuk Dr John A. Xavier is a principal fellow at the UKM-Graduate School of Business. Prior to joining UKM in 2012, Datuk John was a professor at the Universiti Putra Malaysia (UPM) and was an Administrative and Diplomatic Officer (PTD) for 36 years in the Malaysian public service.

This integrative course aims to bring together the various disciplines in strategic management and integrate it at the policy and strategic level. In this course, emphasis is given on the method of making strategic decisions to maintain or increase the competitiveness of business entities. In addition, participants are exposed to various issues and challenges faced by upper level managers. This course also helps participants to analyse the internal and external environments of business entities, and provides guidance on how to develop layers of competitive advantages to outperform competitors for business sustainability.

Objectives:
1. Integrate various functional disciplines in analyzing corporate policy and strategic issues
2. Critically examine business issues of corporations
3. Attain the skills to formulate short and long term strategy, and the systems and processes for implementing strategies well

Methodology:
Lecture, multiple case studies, group exercise and class discussion

Who should attend?
Senior Managers, Managers & Executives

Programme outline:

Day 1 8:30am-5:30pm
- Introduction: Why is strategy important?
- Charting company’s direction : Vision and Mission
- Evaluating Company’s External Environment
- Evaluating Company’s Resources, Capabilities and Competitiveness

Day 2 8:30am-5:30pm
- Five Generic Competitive Strategies
- Strengthening Company’s Competitive Position
- Strategies for International Market
- Corporate Strategies
- Building an Organization for Good Strategy Execution
Datuk Dr John A. Xavier is a principal fellow at the UKM-Graduate School of Business. Prior to joining UKM in 2012, Datuk John was a professor at the Universiti Putra Malaysia (UPM) and was an Administrative and Diplomatic Officer (PTD) for 36 years in the Malaysian public service.

The course explores the determinants of competitiveness and successful economic development viewed from a bottom-up perspective. This means that the sophistication and productivity of firms, the vitality of industrial clusters, and the quality of the business environment in which competition takes place are also ultimate determinants of competitiveness. The course also examines both advanced and developing economies and addresses competitiveness at multiple levels – national, states or regions, particular clusters, and neighbouring countries. Much of the inspiration for this course comes from the Harvard post-graduate course on the Microeconomics of Competitiveness (MOC), created by Professor Michael E. Porter.

**Objectives:**
1. Obtain a deeper appreciation of the determinants of competitiveness both from the top-down and bottom-up perspectives.
2. Able to devise and execute better policies and strategies on national competitiveness.
3. Enhance the capacity of public officers and captains of industry in devising and implementing policies and strategies to enhance national competitiveness.

**Methodology:**
- Lecture, multiple case studies, group exercise and class discussion

**Who should attend?**
- Senior Managers, CEOs & Public Officers

**Programme outline:**

**Day 1 8:30am-5:30pm**
- Competitiveness: An Overall Framework
  - Porter’s Diamond Model of competitiveness: Advanced Economies and Developing Economies
  - Economic Policies and Strategies for Competitiveness

**Day 2 8:30am-5:30pm**
- Clusters: Development and Internationalization
- The Process of Economic Development
- Organizing for competitiveness: Attracting FDIs
EXPERIENTIAL MARKETING
FOR CONSUMERS’ ENGAGEMENT

Ahmad Azmi Mohd. Ariffin (Dr.) is an Associate Professor at UKM-Graduate School of Business. His research interests are in the areas of Marketing Management, Tourism and Hospitality Marketing as well as Services Marketing.

This course introduces the concept of marketing experience in developing strategies and experience marketing campaigns to achieve a strong brand loyalty. Experiential marketing is a marketing approach based on sensational stimulation that leads to a user’s emotional touch on a product or service. Effective marketing strategy based on experience can be a powerful competitive advantage in today’s challenging business environment as it aims to create a memorable product experience. This course emphasizes on “consumer engagement” and “experience design” aspects as the basis for a strategic framework for managing the user experience to create strong emotional bonding among consumers with brands and thus help shape brand loyalty.

Objectives:
1. Apply the concepts, characteristics and interest in marketing experience, and integrate them into overall marketing campaigns.
2. Formulate Experience Design to create emotional bonds between brands and users especially through the “emotional branding” approach.
3. Create effective integrated marketing communication strategy that creates, communicates and delivers high consumer value to the target market.

Methodology:
Lecture, multiple case studies, group exercise and class discussion

Who should attend?
Senior Managers, Managers & Executives

Programme outline:
Day 1: 8:30am - 5:30pm
• Experience economy – the evolution of experience and user experience
• Characteristics of Experience Marketing
• A strategic framework for Experience Management
• Establishment of user experience strategy and emotional branding

Day 2: 8:30am - 5:30pm
• Anatomy of marketing experience campaigns
• Performance and measurement of Experience Marketing
• Brand creation experience
Wan Mohd Hirwani Wan Hussain (Dr) is a university lecturer at UKM-Graduate School of Business and internet marketing entrepreneur. He also specializes in technology transfer, commercialization technology and law.

This course aims to provide understanding and exposure to the basic concept and theories on marketing and organizational strategies including market analysis, market segmentation, strategic analysis, and financial management in a more dynamics way. This course is action learning orientated with the application of technique and strategy that uses computer based software. The course will allow participants to do strategic analysis in business that provides better solutions and competitive advantages.

Objectives:
1. Explain and apply the analytical process in developing marketing strategy for competitive advantage
2. Apply big data technology in marketing
3. Utilize the latest analytics technology in solving issues and problems in organizations and companies

Methodology:
Lecture, case studies, practical exercises, group activities and presentations

Who should attend?
Senior Managers, Managers & Executives

Programme outline:
Day 1 8:30am - 5:30pm
• Introduction to Information Technology for Marketing
• Developing Database
• Big Data Analytics

Day 2 8:30am - 5:30pm
• Decision Making Analysis in Marketing Process
• Security and Privacy in Data Analysis
• Data Validation
Nik Mohd Hazrul Nik Hashim (Dr) is an Associate Professor of Marketing at the UKM-Graduate School of Business. He has more than 20 years of experience as an academician including a casual teaching stint in Australia. He specializes in New Product Development and Innovation Management.

The course covers the centrality of products to the process of exchange in marketing. The need for new products to be managed during the various stages of development is an important skill that will increase the likelihood of success in the marketplace. While much has been operationalized from the technical or manufacturing standpoint, very little attention has been directed at the marketing perspective. Consequently, it is not surprising to learn that 70% of new products fail within the first two years after launch. This course takes a theoretical and practical approach, incorporating situational and problem-based learning to enhance participants’ creativity, constructive thinking, and analytical skills.

Objectives:
1. To apply product innovation strategies in relation to consumer values and firm survival.
2. To utilize the NPD process critically, creatively, and analytically in a group environment towards achieving specific development goals.
3. To use understanding of the target market and consumer behaviour in formulating appropriate product concepts and strategies.

Methodology:
Lecture, case studies, group activities and class discussion.

Who should attend?
Senior Managers, Managers & Executives

Programme outline:

Day 1 8:30am-5:30pm
- Product Innovation Strategies
- New Products and Innovation Domain
- The Role of Customers in New Product Development
- Idea Generation and Management

Day 2 8:30am-5:30pm
- Concept Development and Selection
- Concept Testing Techniques
- Product Development and Prototypes
- Market Testing
Everyone has a brand, but you must put the time and effort into yours if you want to succeed. Learn on your desktop, smartphone or tablet. Social media is a powerful tool, but only if you know how to use it! And even though earlier versions of online communication have flourished since the earliest days of the internet, nothing compares to the versatility, ease of use, and fun factor of social media.

If you really want to harness the power of social media, then I have something you’ll love. We help employers manage the risks and capitalize on the opportunities of social media in the workplace through expert-led, self-paced online training videos and tutorials.

Objectives:
1. To apply the social media marketing framework to create a successful campaign in social media marketing
2. To use the techniques in video marketing strategy and viral marketing to position their brands in the World Wide Web
3. To analyze customer database using search engine marketing

Methodology:
Lecture, multiple case studies, practical exercises, group activities and presentations

Who should attend?
Senior managers, managers, and executives.

Programme outline:
Day 1 8:30am-5:30pm
Why Social Media & Digital Marketing

Challenges in Social Media and Digital Marketing

Tools and Digital Analytics—spying your competitors
• Google Analytics
• Alexa Analytics
• Keyword.io
• Twitter Analytics Tools

Day 2 8:30am-5:30pm
Creating your social media marketing campaign

Developing Video marketing strategy

Mobile Marketing strategy

Launching your social media marketing campaign for the internet
This course encourages participants to consider and critically reflect upon the scope for marketing ideas, theories, and principles for social innovation. Marketing’s insights, concepts and techniques can be applied equally well outside the market place to tackle such behaviour-driven social goals as binge drinking, organ donation, traffic safety, public health and global warming. Social marketing, based on the assertion there is no altruism as human behaviour, is goal seeking & particularly good at value creation when the individual self-interest is not consistent with the collective behaviour of a society. Consequently, social marketing and its focus on social innovation, is an intense societal living systems mechanism that shapes sustainable quality of life for society.

**Objectives:**
1. Effectively apply the relevant marketing tools or analytical frameworks of Social Marketing to solve problems and issues in organizations & marketplace.
2. Make the ideal decision (to diagnose problem and suggest solutions) concerning issues in Social Marketing.
3. Generate and manage information from various sources as well as to portray leadership skills.

**Methodology:**
Lecture, multiple case studies, group exercises and class discussion

**Who should attend?**
Senior Managers, Managers & Executives

**Programme outline:**

**Day 1 8:30am-5:30pm**
- Introduction - Defining Social Marketing
- Social Marketing Planning Process
- Tips for Success
- Determine Research Needs & Options
- Segment, Evaluate & Select
- Set Behavior Objectives & Goals

**Day 2 8:30am-5:30pm**
- Identify Barriers, Benefits, Competition & Influential Others
- Craft a Desired Positioning
- Product- Create a Platform
- Determine Incentives & Disincentives
- Make Access, Convenient & Pleasant
- Promotion Decision on Messages, Messengers & Credibility
Syed Uzair Othman is attached to Graduate School of Business, UKM, as a consultant. Before, he was in management position with a multinational company based oversea, and later became an entrepreneur by running his own group of companies.

This course examines how marketing can interface with entrepreneurship for sustainable value creation by clarifying key marketing concepts, methods, and strategic issues relevant for early-stage entrepreneurs or business start-ups. It distinguishes entrepreneurial marketing from traditional marketing theory as well as examines what marketing processes and tools are more appropriate in entrepreneurial contexts due to resource limitations.

It is designed to teach participants to have a broad understanding of entrepreneurship and its major strategic constraints and issues faced by entrepreneurs today. With that understanding, participants are exposed to various marketing tools to identify and evaluate marketing opportunities, and showed what major marketing and sales tools are most useful in an entrepreneurial setting, with a strong emphasis on inbound marketing strategic planning.

Objectives:
1. Understand the concept of entrepreneurial marketing from the relationship of entrepreneurship and strategic marketing and its relevancy to business start-ups.
2. Develop a flexible and innovative way of approaching the creative process of designing, delivering and communicating values to customers that is appropriate to the limited resources of a new venture.
3. Ability to develop strategic marketing plan for competitive advantage from various strategic marketing practices and tools in an entrepreneurial setting.

Methodology:
Lecture, multiple case studies, group activities and class discussion

Who should attend?
Entrepreneurs & Business Owners

Programme outline:

Day 1 8:30am - 5:30pm
• Definition, concept and interface of entrepreneurship and strategic marketing.
• Traditional marketing vs entrepreneurial marketing
• The concept of STP & D, Marketing Mix, Evaluation & control
• Entrepreneurial marketing overview of relationship, guerilla, expeditionary, viral, ambush, one-to-one marketing.

Day 2 8:30am-5:30pm
• Inbound marketing for entrepreneurs: buyer persona development, consumer journey, and sales funnel blueprint.
• Content marketing strategies
In dealing with the fast-changing business environments, managers are expected to make effective decisions based on facts and data. As such, possessing analytical skills is important to every manager as well as employees in various organizations. An emerging analytic approach is known as Partial Least Squares Structural Equation Modeling, or PLS-SEM.

It is the second generation data analysis technique that aims to predict certain desired outcomes. Its utility is not only limited to prediction, but also to uncovering unobserved heterogeneity and increasing the importance-performance visibility of a target object. PLS-SEM has been used in various fields of study including management, marketing, health care, architecture, and tourism.

**Objectives:**
1. Recognize the importance of PLS-SEM for industry practitioners.
2. Understand basic concepts in and requirements of using PLS-SEM.
3. Use and be familiar with the PLS-SEM analysis.

**Methodology:**
Lecture, case study presentation, and hands-on activities using SmartPLS 3.0

**Who should attend?**
- Senior Managers, Managers, and Executives.
- Anyone interested in improving decision making skills and expand analytics capabilities.

**Programme outline:**

**Day 1 8.30am - 5.30pm**
- Making a case for PLS-SEM: Industry application
- Introduction to PLS-SEM
- Morning refreshments
- Measurement model assessment
- Structural model assessment
- Assessing hierarchical component model
- Preparing PLS-SEM report
Ahmad Azmi Mohd. Ariffin (Dr.) is an Associate Professor at UKM-Graduate School of Business. His research interests are in the areas of Marketing Management, Tourism and Hospitality Marketing as well as Services Marketing.

The module examines the theoretical foundations and practical application of services marketing which include the topics of nature of services, consumer behaviour in service settings, service quality and satisfaction, developing service strategies, managing customer service, service technologies, and the marketing mix for services and service quality. The course teaches broad issues in managing service businesses with a core theme on how customer value is created. The session on destination marketing provides a framework for the successful development and management of tourism destinations. It provides an overview of the methods to ensure long-term viability and sustainability of the tourism industry. Participants will learn how to create a sustainable, financially viable, and a successful tourism marketing campaign.

Objectives:
1. Able to apply of the marketing mix in a service environment to establish a competitive advantage for a firm.
2. Able to practice service quality management to develop customer satisfaction.
3. Execute competitive positioning for destination branding followed by implementing an integrated marketing & communication strategy.

Methodology:
Lecture, multiple case studies, group exercise and class discussion

Who should attend?
Senior Managers, Managers & Executives in the Tour & Travel Industries

Programme outline:

Day 1: 8:30am - 5:30pm
• Exploring the Transformational Challenges of Tourism Destination Marketing
  • Conceptualizing the Tourist Destination
  • Strategizing Tourism Destination Marketing: “Value Exploration Strategy”

Day 2: 8:30am - 5:30pm
• Strategizing Tourism Destination Marketing: “Value Creation Strategy”
  • Strategizing Tourism Destination Marketing: “Value Delivery Strategy”
The module provides in depth understanding of the importance of local government as, arguably, the tourism industry’s most important partner in determining the level and quality of tourists and infrastructure availability, supporting local attractions and experiences which attract tourists, and the public money that is invested in destination promotion.

It highlights management of the regulatory environment for sustainable tourism and factors that influences tourism development and investment under which tourism businesses operate. The module also exposes participants to the functions of National Tourism Organizations, provides a bird’s eye view of the tourism industry in Malaysia, snapshots of Malaysia National Tourism Policy, and issues and challenges of Tourism in Malaysia’s Economic Transformation Programme.

Objectives:
1. To manage the tourism environment that will enhance the tourists’ experience
2. To coordinate efforts from all the stakeholders for successful destination tourism
3. To regulate the environment for sustainable tourism development

Methodology:
Lecture, multiple case studies, group exercise and class discussion

Who should attend?
Senior Managers, Managers & Executives in the Tour & Travel Industries

Programme outline:

Day 1 8:30am-5:30pm
1. Local Government in Tourism Policy, Planning & Management
   • Key Concerns of Local Government
   • Sustainable Development Values & Cultures
   • Good Governance

2. Local Government Roles & Responsibilities
   • Legislation Management of Public & Environment

3. The Changing Role of Local Government
   • Tourism Management Concern & Issues
   • Approach to Local Tourism Management & Planning

4. Local Government Commitment & Contribution
   • Environmental, Social, Political & Economic Factors
   • Past Experiences & Practice
The workshop will provide participants with a broad understanding of the Domestic Tourism sector, and equip them with the knowledge and skills to maximize the business potential of the industry for domestic market.

You will learn the importance of Tourism as an economic and social phenomenon to the extent of becoming the key driver for socio-economic progress.

Over two days participants will learn how to develop domestic tour packages including niche markets and tour guiding. Participants will be provided with guidance and systematic method on how to develop and plan an inclusive Tour Package. They will also learn how to strategically market and promote inbound tourism using the latest marketing tools and channels.

Objectives:
1. To apply service marketing concept in putting together various services into the marketing mix to create value for the intended consumers.
2. Gain insight into the development of marketing tools in the domestic tourism industry
3. Attain the skill to plan and develop an itinerary and tour package

Methodology:
Lecture, class discussion, group activities & presentation.

Who should attend?
Senior Managers, Managers & Executives in the Tour & Travel Industries

Programme outline:

Day 1: 8:30am - 5:30pm
1. History of Travel & Modern Tourism
   • Importance of Tourism Marketing
   • New Trends in Tourism Marketing
   • Challenges of Promoting Tourism
2. Developing and Planning a Tour Package
   • Total Tourism Experience: Managing Tourism Value Chain
   • Components of Successful Tourism Products & Services: 5As Analysis
   • Type of Travel & Tour Packages

Day 2: 8:30am - 5:30pm
3. Stages of Developing and Planning a Tour Package
4. Strategic Consultative Selling Of Tourism
   • How technology changes tourism industry
   • Strategies to Improve Profit
Social media has become a major component of digital marketing and thus, in today’s marketplace, organizations need effective and profitable social marketing strategies.

In this Bootcamp, participants will learn to use social media tools and platforms to design, manage, and optimize social campaigns to promote growth, shape brand image and spark brand awareness in the global digital marketplace.

Participants will be exposed to the essentials of social media marketing in various forms including Internet forums, Facebook, Instagram, Twitter, Pinterest, Google+, YouTube, Weblogs, and podcasts.

Objectives:
1. To establish social media goals and objectives.
2. To develop a social media promotional plan to achieve successful online campaigns.
3. To adopt best practices for using Facebook, Twitter, LinkedIn, Google+, YouTube, and other social media tools.

Methodology:
Lecture, class discussion, group activities & presentation.

Who should attend?
Senior Managers, Managers & Executives in the Tour & Travel Industries

Programme outline:

Day 1 8:30am-5:30pm
1. Introduction to social media trends
2. How to use social media in achieving marketing objectives
3. Social media tools: Facebook, Instagram, Twitter, Pinterest, LinkedIn, Google+, YouTube,
4. Practicum
   • Establishment of social media goals and objectives
   • Email, Facebook & Instagram Marketing (hands on application)
   • Develop customer database

Day 2 8:30am-5:30pm
5. Social media benchmarking – Market practices
6. Social media promotional plan
7. Practicum
   • Extension of social media: Twitter, Pinterest, LinkedIn, Google+, YouTube, Weblogs/ Blogging
Datuk Dr John A. Xavier is a principal fellow at the UKM-Graduate School of Business. Prior to joining UKM in 2012, Datuk John was a professor at the Universiti Putra Malaysia (UPM) and was an Administrative and Diplomatic Officer (PTD) for 36 years in the Malaysian public service.

This programme applies strategic frameworks to help participants develop practical strategies to improve business sustainability of their organisations. Participants will review both their internal and external environments to enable them to obtain insights on the opportunities and challenges for making their business sustainable.

The course will also investigate the impact of technology and innovation on the organisation. Participants should be able to formulate a practical action plan for overcoming the barriers to and seizing the opportunities for creating a sustainable business.

The course covers the following topics: formulating the strategic direction, understanding strategy and value creation, competitive advantage, value-chain analysis, and strategy formulation and execution.

Objectives:
1. Able to draft a strategic direction and action/business plan for their company
2. To develop know-how on strengthening the value chain for greater profitability
3. Able to undertake strategy formulation

Methodology:
Lecture, class discussion, group activities & presentation.

Who should attend?
Senior Managers, Managers & Executives in the Tour & Travel Industries

Programme outline:
Day 1 8:30am-5:30pm
1. Setting the strategic direction – vision, purpose/mission, values
2. Practicum on reviewing the participant company’s strategic direction
3. Understanding strategy and value creation; analyzing the industry and positioning the company in the marketplace
4. Practicum on how the participant company can contribute value; and differentiate itself from the rest of the other businesses in the industry, that is, position itself in the industry
5. Competitive advantage and the value chain
6. Blue ocean strategy and business plan
7. Drafting a business plan
Governance remains an important component in business management. Similarly important is the sound and prompt decision making by the management in, more often than, less than ideal situation. In the complex, ever-changing, and uncertain business environment, corporate governance can no longer rely on traditional compliance and decision-making techniques. It requires a holistically responsible leadership that is committed, responsive and innovative to support agile approaches in strategic decision-making.

This course covers the governance framework based on agile and responsive business models. It focuses on various challenges of leadership and analyses symbiotic relationship between leadership & decision-making in different situations and contexts for better corporate governance. Moreover, it will help the participants to make decisions under pressure and uncertainty, and to motivate others toward ones’ vision.

**Objectives:**
1. Able to identify & apply the concepts and philosophy of governance and decision-making.
2. Able to evaluate the issues of governance and decision-making holistically and chronologically for better decision-making.
3. Able to solve complex problems related to governance and decision-making.

**Methodology:**
Lecture, case studies, group activities and presentations

**Who should attend?**
Senior Managers, Managers & Executives

**Programme outline:**

**Day 1 8:30am-5:30pm**
- Introduction: Leadership in the twenty-first century
- Governance structures and the role of leadership
- The new and emerging challenges of leadership
- The rational model & the new model of decision-making
- Factors influencing decision-making
- Leadership & decision-making
- Dealing with conflict
- Dealing with resistance to change
- Personal leadership development
The drive for corporate sustainability is reshaping the business landscape and creating new business opportunities. The development of a sustainable strategy requires specific leadership knowledge, attributes, and perspectives to address competitive business environment and myriads of other challenges in a more effective way.

This course will show participants how to integrate sustainability into their organisations and create sustainable business practices by incorporating principles of leadership and change management. This course highlights the essential role that the leaders play in the success of sustainability initiatives as well as presents specific leadership strategies that facilitate sustainability implementation.

The key component of this course is to build leadership skills in managing and leading changes in today’s complex and dynamic business environment.

**Objectives:**
1. To define sustainability and identify the success factors of a leadership in implementing the sustainability initiatives
2. To apply strategic leadership practices in the implementation of sustainability initiatives and change management.
3. To devise strategies for developing sustainability leaders and overcoming resistance to change in sustainability implementation.

**Methodology:**
Lecture, case studies, practical exercises, group activities and presentations

**Who should attend?**
Senior Managers, Managers & Executives

**Programme outline:**

**Day 1 8:30am-5:30pm**
- Introduction- Comparison of leadership theories
- Leadership Contingency Theory
- Dimensions of an effective Leadership
- Markets and sustainability
- Strategic leadership & Sustainable Strategies
- Sustainable leadership model
- Sustainable leadership development program
- The strategic implications of implementing Sustainability Strategies
- Manage changes and leadership actions
In the context of intense business competition, an organisation needs to be in a state of constant readiness to face any challenges in the business environment to ensure the sustainability of the organisational growth. At a time when the organization faces various geopolitical, social, macroeconomic, and technological changes in the ever-changing dynamic environment, the organizational management needs to have a leadership with a new mind-set to plan and coordinate organizational strategies and tactical operations. The leadership needs to be innovative, proactive, resilient, and agile enough to face the market’s dynamics in order to remain ahead of competitors.

The course will focus on the practical analysis of competitive environment (micro & macro), crisis and change management, dynamic organizational design and structure, and the strategic nimbleness of a leader to the changing and challenging environment.

**Objectives:**
1. To analyse the competitive business environment for practical solutions & decision-makings.
2. To manage the diversity of strategies and encourage continuous innovation within the organization.
3. To manage organizational crisis in a more holistic way.

**Methodology:**
Lecture, case studies, practical exercises, group activities and presentations

**Who should attend?**
Senior Managers, Managers & Executives

**Programme outline:**

**Day 1 8:30am-5:30pm**
- Introduction to leadership theories and practices
- What is complex time?
- Competitive business environment assessment
- Traits of a business leader
- Leadership framework in complex time
- Develop Personal Adaptability
- Leverage Network
- Foster Innovation
- Cultivate Leadership Agility
- Strategic thinking in a complex time

**LEADING IN A COMPLEX WORLD**

Fazli Idris (Dr) conducts course in Operations Management based on his industrial experience working for SONY Corporation, prior to joining UKM. He also manages MBA Projects & conducts trainings in project management, operations strategy & quality management.
Top management can and may be less effective in leading system change, generating continuous innovation, and responding quickly to the demands of the 21st century. Leadership from the Middle represents a new and powerful approach instead of the limited approach of top-down and bottom-up thinking.

Leadership from the middle zone mobilizes a more widespread human resources to work more effectively up and down the organizational hierarchy as well as across functions and silos.

The course will show how you can adjust and thrive in the middle zone by influencing peers, managing relationships, and navigating centres of influence and power. The course will also train you to have a greater influence on the organization’s health and success. It will show you how to avoid the pitfalls of dragging down not only those you lead, but also those that lead you.

Objectives:
1. To adopt a systematic way of thinking and acting by seeing patterns in processes and functional responsibilities within the complexities of an organization.
2. To develop communication skill to handle countless relationships as well as handling the rapid flows of information within the organization and among the stakeholders.
3. To be more agile in responding to the ever changing business environment.

Methodology:
Lecture, case studies, group activities and class discussion

Who should attend?
Senior Managers, Managers & Executives

Programme outline:
Day 1 8:30am-5:30pm
• Overview of Leadership Theories
• The Middle Managers and their crucial roles
• The challenge of getting the top and the bottom of the hierarchy to work together

Digital Citizenship In The Workplace

Wan Mohd Hirwani Wan Hussain (Dr) is a university lecturer at UKM-Graduate School of Business and internet marketing entrepreneur. He also specializes in technology transfer, commercialization technology and law.

A good digital citizen understands the rights and responsibilities that come with being online and utilizes technology in a positive way. Whilst technology offers incredible improvement in terms of accessibility and communication, the digital realm can be problematic in many other ways for employees. It can also serve as the breeding ground for negative social interaction that negatively influenced the working environment.

Henceforth, companies seek to educate employees on the norms of appropriate, responsible, and healthy behaviour with regard to technology use in order to maximize productivity and protect its public image.

This course educates participants on the rights, privileges, and obligations for using technology responsibly in a digital world. It highlights how the healthy and responsible use of technology will ultimately protects a company’s value, image and bottom line and sustainable growth.

Objectives:
1. Able to incorporate the nine elements of digital citizenship in the workplace
2. Able to identify positive, negative, and grey areas of digital citizens, different digital generations and digital gaps
3. Able to apply eight elements of digital citizenship in the workplace

Methodology:
Lecture, case studies, practical exercises, group activities and presentations
