

**POSTGRADUATE PROGRAMME AT
SOUTHEAST ASIA DISASTER PREVENTION RESEARCH INSTITUTE
UNIVERSITI KEBANGSAAN MALAYSIA (SEADPRI-UKM)**

1. Introduction

Southeast Asia Disaster Prevention Research Institute, Universiti Kebangsaan Malaysia (SEADPRI-UKM) was established to carry out research and provide advice in disaster related fields, especially in Southeast Asian region. This is done by providing a new technological platform for cross-, multi-, and inter-disciplinary research in understanding and solving problems about disaster. Research conducted in SEADPRI contributes to the development of a new system and technology to deepen knowledge about processes related disaster.

The objectives of SEADPRI are:

- To become a research centre focuses on climatic, geological, and technological hazards at the national level and in the Asian region
- To become a multidisciplinary research centre in disaster management especially in the contexts of disaster, governance and prevention as well as post-disaster response
- To develop skilled human capital in disaster issues for the government and private sectors through graduate programmes, especially in science and technology, social and governance aspects in disaster
- To become the reference centre on disaster science and governance in disaster Southeast Asia

Presently SEADPRI offers graduate research program in Masters and PhD levels which involves studies relating to disaster in the following areas:

- Policy and Disaster Management
- Climatic Hazards
- Geological Hazards
- Technological Hazards
