Contents

Preface
Acknowledgements

List of abbreviations

Chapter 1: Introduction

The need for environmental assessment
Objective
Using the guide

Chapter 2: The context of environmental analysis

Policy framework
Social context
Institutional framework and EIA
Legal framework for EIA
Building institutional capacity

To carry out an EIA
To implement the recommendations of an EIA

Chapter 3: EIA process

Resources
Screening
Scoping
Prediction and mitigation
Management and monitoring
Auditing
Public participation
Managing uncertainty
Techniques

Baseline studies
The ICID Check-list
Matrices
Network diagrams
Overlays
Mathematical modelling
Expert advice
Economic techniques

Final report - Environmental impact statement

Chapter 4: Major impacts of irrigation and drainage projects

Hydrology
Low flow regime
Flood regime
Operation of dams
Fall of water table
Rise of water table

Water and air quality
Solute dispersion
Toxic substances
Agrochemical pollution
Anaerobic effects
Gas emissions

Soil properties and safety erects
Soil salinity
Soil properties
Saline groundwater
Saline drainage
Saline intrusion

Erosion and sedimentation
Local erosion
Hinterland effect
River morphology
Channel structures
Sedimentation
Estuary erosion

Biological and ecological change
Project lands
Water bodies
Surrounding area
Valleys and shores
Wetlands and plains

Socio-economic impacts
Population change
Income and amenity
Human migration
Resettlement
Women's role
Minority groups
Sites of value
Regional effects
User involvement
Recreation

Ecological imbalances

Pests and weeds
Animal diseases
Aquatic weeds

Human health

Disease ecology
Specific risks and counter measures
Health opportunities

Chapter 5: Preparation of terms of reference

Determining study requirements
Contents of the TOR

Chapter 6: References

Recommended texts
Bibliography

Annex I: Glossary
