

MAKLUMAT KURSUS

1. Kod Kursus : FFEP 1122
2. Nama Kursus/
Course Title : Asas Patologi
Basic Pathology
3. Kredit : 2
4. Taraf Kursus : Wajib Fakulti
5. Sinopsis/Synopsis :

Kursus ini mendedahkan pelajar mengenai pengenalan kepada proses asas patologi dan konsep umum penyakit. Pelajar akan mempelajari mengenai konsep asas patologi, inflamasi, penyembuhan luka, regenerasi sel, edema, renjatan dan kesan gangguan aliran darah. Disamping itu, pendedahan berkenaan patologi genetik dan neoplasia juga diberikan. Perbincangan mengenai hubungkait pelbagai proses patologi dengan pelbagai ketaknormalan sel, tisu dan organ akan turut didedahkan kepada para pelajar.

This course exposes students about the introduction of basic pathology processes and general concepts of disease. Students will learn about the basic concepts of pathology, inflammation, wound healing, cell regeneration, edema, shock and impairment of blood flow. In addition, exposure to genetic pathology and neoplasia are also given. Discussions on the various pathological processes associated with various abnormalities of cells, tissues and organs will also be exposed to students.

6. **Pra-Keperluan:**

Tiada

7. **Senarai Hasil Pembelajaran Kursus/Course Learning Outcomes List**

- HPK 1 :** Menerangkan konsep asas neoplasia, inflamasi akut dan kronik.
Explain the basic concepts of neoplasia, acute and chronic inflammation.
- HPK 2 :** Mengklasifikasikan mekanisme penyakit akibat kecederaan sel, kesan gangguan aliran darah, renjatan dan gangguan genetik.
Classify the mechanism of illness due to cell injury, effects of blood flow deterioration, shock and genetic disorders.
- HPK 3 :** Menerangkan perubahan patologi peringkat sel yang berlaku akibat proses patologi, mekanisme penyembuhan luka dan pembaikan tisu.
Explain the pathological changes in cellular stages due to pathological processes, wound healing mechanisms and tissue repair.
