Board of
Pharmacy

**25 years
history**

History of the Faculty

Our programme was established in 1994 to meet the shortage of professionals in the pharmaceutical care sector.

Initially, the BPharm. (Hons.) programme was offered under the Department of Pharmacy, Faculty of Allied Health Sciences. We grew rapidly in the first 10 years and required a relocation from the UKM campus near Titiwangsa Lake Garden to Jalan Raja Muda Abdul Aziz, Kuala Lumpur, which is our current

location. Our advancement in the field of pharmacy along with our recognised graduate quality and professional status of pharmacy programme were the driving factors that have led our growth from a Department to a Faculty on 1st June 2008. We are now known as the Faculty of Pharmacy with more than 25 years of excellence in pharmacy education.

+ Future Job Opportunities

Pharmacist & Healthcare Advisor

Pharmacist

After completion of the professional training, most of our graduates become practicing pharmacists. Pharmacists are drug experts, who have a good knowledge and required competencies on all aspects of medications from product development to their clinical uses. They work in various settings such as the government and private hospitals, health centers, community pharmacies, pharmaceutical industries, regulatory bodies, government administrative offices, pharmaceutical marketing companies, research centres and academia.

Healthcare Advisor

Our graduates are equipped with knowledge in healthcare and medicines which enable them to act as effective health professional consultants providing advice to health insurance sectors, policy-making institutions, cosmetics and health product industries.

Other Job Opportunities

With creative and entrepreneurial mind and digital technology know-how, job opportunities for our graduates are limitless.

Our
bachelor
degree
programme
duration is 8
semesters
(4 years)

The four-year journey with us

We designed our curriculum focusing on student-centered learning. Students take responsibility of their own learning with close guidance from the academics.

First Year (Getting Ready)

Initially, you will learn the basis of medical and health sciences, pharmaceutical chemistry, communication skills and the life of a pharmacist.

Second Year (Building Foundation)

In the second year, you will learn to build a strong knowledge on drug actions, chemistry of drugs, formulation of drug products and basic disease management and patient care.

Third Year (Applying Knowledge)

Now is the time to apply the acquired knowledge. You will learn the processes of drug manufacturing, methods to analyse the quality of drug products, approaches to manage patient's drug therapy, and conducting research.

Final Year (Practicing & Providing Care)

In this immersive year, you will experience real-life training on industrial production of medications, management of pharmacy businesses, delivery of pharmacy-related services in hospital and community settings, treatment of diseases on real patients and the application of pharmacy related policies.

Language of delivery

English language is extensively utilized in teaching and learning activities to enhance confidence and communication skills of our students. Bahasa Melayu is used to address local scenarios and the Malaysian culture. We emphasize to our students the importance of proficiency in both languages to meet the local and global needs.

+ Life as our students

Leaders, Responsible Citizens & Community-Focused

A balanced graduate is a product of quality formal and informal learning. You will have the opportunity to be involved in a variety of projects for co-curricular activities by engaging with our student society. You will experience enriched informal learning by actively participating in these projects. You will make new friends, learn from your peer and expand your circle of contacts. The projects inculcate leadership, volunteerism, effective communication and organizational skills. Our alumni also support the training of our students.

Our flagship projects

- Community Service Programmes
- Pharmacy Awareness Day
- Pharmacy Annual Dinner
- GAln Charity Event
- JATI Entrepreneurial Project
- Annual Pharmacy Sports Carnival
- International Mobility Programmes to Thailand, Philippines, Indonesia and other ASEAN countries

Our Educational Facilities

World-class experience

Our educational facilities are located at Jalan Raja Muda Abdul Aziz campus in the heart of Kuala Lumpur and UKM Medical Centre in Cheras. Throughout the four years, you will learn in our world-class laboratories, mock manufacturing plant, active learning & clinical pharmacy simulation suites, community pharmacy and modern teaching hospital (Hospital Canselor Tuanku Muhriz). Our research laboratories are well equipped and maintained to produce quality research outputs. Our faculty members are friendly and able to provide appropriate advice for your learning needs. Our faculty members are also recipients of various awards in teaching & learning, community engagement and research.
