PROFESSIONAL CERTIFICATE

Introduction

Courses

The Faculty of Health Sciences, Universiti Kebangsaan Malaysia (UKM), offers a range of Professional Certificate Courses designed to equip healthcare and allied health professionals with specialised, industry-relevant skills. Covering areas such as rehabilitation, clinical diagnostics, medicolegal practice, telehealth and forensic science, these programmes integrate theoretical knowledge with practical application through flexible learning modes including online, hybrid, and face-to-face formats. With varying durations to suit working professionals, the courses support continuous professional development, upskilling, and adaptability to emerging trends in modern healthcare.

Why Choose us?

Specialized Clinical Upskilling

- Address critical regional skill shortages with evidence-based, holistic curriculums.
- Features the only university-accredited Auditory-Verbal Therapy (AVT) program in the region

Flexible & Hybrid Learning

- Tailored for time-poor, working professionals. Study modes adapt to your schedule, featuring 100% online, hybrid models and highly targeted face-to-face intensives ranging from 5 days to 6 months

Career Advancement & Compliance

- Meet continuous education demands, master complex medicolegal risks, and prepare for critical leadership roles within highly specialized clinical and investigative disciplines.

Recognized & Claimable

- University-accredited programs offering high ROI. Several certificates proudly bear the HRD Corp Claimable status, maximizing professional development budgets for both employers and candidates.
