

3rd International Conference Limits to Growth & Sustainability: Contemporary Issues & Perspectives

5th - 7th December 2015

Universiti Kebangsaan Malaysia, Kampus Tuanku Abdul Halim Mu'adzam Shah,
Pusat Penyelidikan Langkawi (PPL), Langkawi, Kedah, Malaysia.

Organised by:
Center for Interdisciplinary and Integrative Studies (CIIS) &
Institute for Environment and Development (LESTARI)
Universiti Kebangsaan Malaysia

FINAL CALL FOR PARTICIPANTS

Deadline: 24th November 2015

Since the studies of the Club of Rome on the limits to growth in the 1970s and other observations, it has been shown that many have gone beyond the predicted limits in terms of resources, population and the environment. In view of these, diverse views from the sides of systems theory, analytical formalism, economics, finance, institutionalism, global social contract can be addressed in a multidisciplinary way.

Academics, practitioners and scholars are invited to participate in this global interdisciplinary dialogue. The papers presented following reviews will be selected for publication and dissemination through the Journal of Ethics, Economics and Finance (JEEF). JEEF is published biannually by Cambridge Scholarly Publication in Cambridge, England.

Specific areas but not limited to these are;

1. The purview of systems in the social, economic and physical sciences.
2. The application of system sciences to a broad conception of sustainable resources and their linkages.
3. The social and cultural dynamics in the ethical reconstruction of global social contract.
4. National and global experiences in mitigating the issues on growth.
5. Policy and institutional perspectives in addressing the issues on growth.
6. The social and cultural factors that influence the use of resources towards sustainability.
7. The spiritual and psychological factors that can contribute towards sustainability and human well being.
8. The challenges of the limits to growth and sustainability to developed and developing nations.

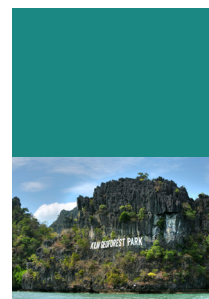

The two days' conference is intended to be interactive with (i) panel discussion; (ii) keynote lectures; (iii) presentations; and (iv) general participation from those in informed walks of life including academia and practitioners, scholars and policymakers.

Themes:

- Social, Cultural and Ethical Dimension
- Physicals and Environmental Sciences Issues on Sustainability
- Economics, Finance and Policy Issues
- LESTARI special session on Climate Change, Disaster Reduction and Sustainable Livelihood
