INTRODUCTION

Mode of Study	: Coursework
Duration	: 4 years (8 Semester)
Local Student	: Full Time only
Intake	: October 2022

This is a basic nursing courses to provide first level nurses who are capable of responsibility in clinical nursing a high level, and at the same time trying to improve the quality of services through continued research and development in the field of nursing. It is a 4 year course that includes all the courses taught in the diploma program includes in-depth medical care, and social sciences, humanities, nursing research, public health and society, and management science. Additional course work will enhance professional development and will provide them to practice more widespread, better understanding of the issues of cultural, political, economic, and social, have more capacity to adapt to change and to work in interdisciplinary team and also to integrate clinical expertise with knowledge of community resources.

Bachelor of Nursing offers a credit score higher in liberal education in philosophy and theories of nursing, medical sociology, issues of ethics and medicolegal, a more intensive approach to critical thinking and problem solving, the ability to analyze and communicate data, education and patient counseling. Even more important is the development of the skills of communication and leadership skills, patient education, and skills in patient assessment, planning and evaluation of care, including the development of critical pathways which is essential in the clinical scene.
