

DOCTOR OF MEDICINE

MALAYSIAN STUDENTS

INTRODUCTION

The medical course comprises of 2 phases: a preclinical phase (2 years) with integrated basic medical sciences and clinical phase (3 years) where the last year is junior medical clerkship. Problem solving, methods of inquiry, critical thinking, and independent learning strategies are emphasized.

Our aim is to produce well-rounded medical professionals who are able to serve society in challenging and varied work environments and who are well-positioned for further postgraduate training. Students are supported by a mentor-mentee system throughout the programme. The course also equips graduates with life-long learning and medical research capabilities via a special research module.

At the end of the course, students are expected to graduate with competencies in the relevant areas of knowledge and clinical skills, as well as leadership and communication skills pertaining to working with other healthcare professionals.
