### Job Description

We are seeking a highly skilled and experienced Senior Software Tester with 2+ years of experience to join our dynamic team. As a Senior Software Tester, you will play a pivotal role in ensuring the quality, reliability, and performance of our software products. Your expertise in designing and executing comprehensive testing strategies, along with your ability to lead and mentor a team of testers, will contribute to the continuous improvement of our software development processes.

### Responsibilities

- 1. Test Strategy Development:** Collaborate with cross-functional teams to develop comprehensive testing strategies for various software projects, considering factors such as project scope, objectives, and user requirements.
- 2. Test Planning:** Lead the creation of detailed test plans, outlining testing scope, objectives, resources, and schedules. Ensure alignment with project milestones and delivery timelines.
- 3. Test Execution:** Perform manual and automated testing of software applications, including functional, regression, performance, and usability testing. Identify defects, track issues, and work closely with development teams to ensure timely resolution.
- 4. Test Automation:** Drive the automation effort by developing and maintaining automated test scripts, frameworks, and tools to increase testing efficiency and coverage.
- 5. Team Leadership:** Provide guidance and mentorship to junior testers, fostering their professional growth and ensuring adherence to best practices and quality standards.
- 6. Defect Management:** Manage the defect lifecycle, including identification, documentation, prioritization, and verification of defect fixes. Collaborate with development and product teams to ensure accurate defect resolution.
- 7. Continuous Improvement:** Proactively identify opportunities to enhance testing processes, tools, and methodologies. Implement improvements to drive efficiency, effectiveness, and overall software quality.
- 8. Collaboration:** Work closely with developers, product managers, and other stakeholders to understand project requirements, clarify issues, and communicate testing progress and results effectively.

9. **Documentation:** Create and maintain comprehensive test documentation, including test cases, test scripts, test data, and testing results, to support transparency and knowledge sharing.

10. **Performance Analysis:** Analyse performance metrics and conduct load and stress testing to ensure software applications meet scalability and performance requirements.

11. **Risk Assessment:** Identify and assess project risks related to software quality and testing. Propose mitigation strategies and escalate critical issues as necessary.

### Qualifications

- Bachelor's degree in **Computer Science, Engineering, or related field**. Master's degree is a plus.
- Proven experience (2+ years) as a Software Tester or QA Engineer, with a strong background in manual and automated testing.
- In-depth knowledge of software testing methodologies, tools, and best practices.
- Proficiency in test automation using industry-standard tools and frameworks (e.g., Selenium, JUnit, TestNG, etc.).
- Strong programming skills in languages such as Go, C, TypeScript, JavaScript, Java or similar.
- Experience with version control systems (e.g., Git) and continuous integration/continuous deployment (CI/CD) pipelines.
- Solid understanding of software development processes, including Agile and Scrum methodologies.
- Excellent problem-solving and debugging skills, with a keen attention to detail.
- Strong leadership and mentoring abilities, with a proven track record of guiding and motivating teams.
- Effective communication skills, both written and verbal, to convey complex technical information to diverse audiences.
- ISTQB, MSTB or other relevant certifications are a plus.
- Experience in testing web applications, mobile apps, and API services is desirable.
- Familiarity with performance testing tools (e.g., JMeter, LoadRunner) is advantageous.

### Additional Information

#### Years Of Experience

2 Years

#### Qualification

Bachelor's degree in computer science, Engineering, or related field.
