Bachelor of Speech Science (Honours)

1. Program Summary

The UKM Speech Sciences program primarily prepares students to practice as speech-language therapists (SLTs) (also known as *Pegawai Pemulihan Perubatan Pertuturan*), who are experts in communication. SLTs are health practitioners who identifies, diagnose and treats individuals with speech sounds, fluency, voice, language, literacy, social and cognitive communication, as well as feeding and swallowing problems. Students will take on foundation and basic science courses at the UKM KL campuses prior to clinical learning, which takes place at our in-house clinic facility, as well as other external clinical placement, schools and community sites.

2. Life at the Faculty

Students will have the opportunity to interact with faculty members with diverse areas of specializations and immerse in the many peer-assisted learning activities that are either self-initiated or organized. Excitingly, the program also actively connects our students with other students, programs and professionals internationally, via exchanges and projects to serve the local community, to model collegial networking and in enriching student's learning experience. The campus is located strategically in the heart of Kuala Lumpur which offers students an opportunity to experience life in the capital city of Malaysia. Various facilities including the library, cafeterias and student lounges are available for the students to study, to have discussion sessions with their peers or to have a break in between lectures. Student accommodation is located near Taman Tasik Tititwangsa an urban recreational park spreading across an area of 95 hectares with 57 hectares of lake. Students will able relax or exercise at the park if they require a change of scenery. The program also has a tight-knit relationship with the alumni and industrial stakeholders to help mould the students to become a professional in their career pathway.
